

# AIRELITE™ 100 / AIRELITE™ 100E

## APPLICATION

The AireLite™ product line is the latest additions to the LightPointe's Enterprise Fast Ethernet solutions. Built on the heritage and success of the original FlightLite™ product line that has been deployed in more than 60 countries worldwide, the AireLite™100 and AireLite™100E are ideal to solve Enterprise building-to-building connectivity problems. Equipped with the integrated AireManager™ management platform, the AireLite™ products can be monitored and managed via a standard Internet web browser or SNMP based network management system.

For customers who currently lease copper access between buildings or who are considering costly fiber-optic cable, the LightPointe solutions offer significantly higher bandwidth with full-duplex speeds and a welcome end to recurring monthly fees. The AireLite™100 and 100E provide attractive wireless bridging solutions at higher data rates than competing unlicensed RF alternatives.

## KEY FEATURES

- Copper Interface** – Easily integrates into existing LANs. “Plug and Play” install with CAT5 cable.
- Power over Ethernet** – Product installation simplified with no need for costly electrical wiring runs or new outlets.
- Fast Ethernet Speed** – Full-duplex 100Mbps speed is considerably faster than unlicensed RF alternatives.
- Immune to RF Interference** – All LightPointe Optical Wireless products are free from radio frequency interference and spectrum saturation issues.
- Lightweight, Compact Design** – At 4.5kg (9.9 lbs), the AireLite™100 and AireLite™100E are lightweight, powerful and simple to install.
- Robust Outdoor Enclosure** – Weatherized, rugged and designed for outdoor installations in environments of -30°C to 60°C (-22°F to 140°F); heat shields are also available for hotter climates.
- Integrated Heater and Lens Defroster** – The AireLite™ 100 and AireLite™ 100E are equipped with an integrated heater and a lens defroster for low-temperature climates .
- Eyesafe Operation** – All LightPointe products are rated Class 1M, the internationally recognized standard for eye-safe operation of laser based communications systems.
- Web based Management** – The AireLite™ product line can be monitored via a standard Internet based web browser.
- SNMP Management** – The AireLite™ products line fully supports SNMP based network monitoring, management and alarm reporting.
- Upgradable Software** – Internet based uploading of system firmware and software.

## UNIT SPECIFICATIONS

Description  
Receiver/Transmitter(s)  
Dimensions (WxHxL)  
Unit Weight  
Operating Voltage  
Operating Temperature  
Humidity Range  
Power Consumption Max  
Immune to EMI & RF Interference  
Built-In Alignment Telescope  
Built-in Management  
Built-In Heater and Lens Defroster

## AIRELITE™100 & AIRELITE™100E

Fixed Optics System  
One transmitter, one receiver  
215x200x400 mm (8.5x7.9x15.75 in)  
4.5 kg (9.9 lbs)  
48V (PoE-injector)  
-30 C to 60 C (-13 F to 140 F)  
Up to 95% non-condensing  
20W  
Yes  
Yes  
Yes, Web browser, Telnet, and SNMP (v.1/v.2c)  
Yes; auto activation at 15 C (59 F)

## FREE SPACE SPECIFICATIONS

Bit Rate  
Free-Space Optical Transmitter  
Free-Space Wavelength  
Optical Receiver  
Receive Power Indicator  
Status Indicator (LED)

10Mbps to 100Mbps, full-duplex  
VCSEL  
850 nm  
Si APD  
10-level bar graph  
Power, TX Data, LOS, Overload, Data In, Data Out

## INTERFACE

Protocol  
Power Over Ethernet  
Data Connector  
Management Connector  
Terminal Connector  
Others

10/100-Base-TX Ethernet, auto, full-duplex  
High Power Over Ethernet via LightPointe PoE injector  
Copper RJ-45  
Copper RJ-45  
RJ-12  
Link Pass Through enable/disable

## CLASSIFICATION

IEC/EN 60825-1/A2  
Class 1M

## RECOMMENDED OPERATIONAL RANGES

Corporate Office  
10140 Barnes Canyon Road  
San Diego, California 92121
